

Alina Kaleeva

QA ENGINEER

Profile

[Resume](#)

I am engaged in testing financial blockchain projects. In total, I tested 8 blockchain projects: blockchain banking, crypto wallet application, online store, blockchain explorer, blockchain game, company website application, blockchain investment project. The projects are written in React js, React Native, NodeJs and use mongodb databases.

My achievements: built testing processes that increased the quality of projects.

I am part of the company's project support team.
