Professional experience

Scrump LLC**QA engineer**

June 2021 - up to the present moment.

I am engaged in testing financial blockchain projects with client and server parts. In total, I tested 8 blockchain projects developed by our company employees: blockchain banking, crypto wallet application, online store, blockchain explorer, blockchain game, company website application. The projects are written in React js, React Native, TypeScript and use mongodb databases.

My achievements: built testing processes that increased the quality of work of 8 blockchain projects developed by our company.

I am part of the company's project support team.

Testing web application, both client and server parts:

- Searching and finding bugs, bug reporting (Jira);
- Creating and reviewing checklists and test cases;
- Experience with git version control system, cloned and deployed locally an application for testing with VSCode editor using node package manager (Yarn);
- Functional, non-functional testing;
- Identify, isolate, replicate, report defects;
- Mobile testing (Android Studio);
- Working with API (Postman);
- Interaction with the development team.

Education

2018-2022

Belarusian State Economic University.
Specialization: finance and credit.

IT Courses

2023

Stepik.org - Test Automation with Selenium and Python

2023

Corporate English lessons

2021

QA courses from It Academy STORMNET

2020-2021

Beonmax - Web development(HTML, CSS)

2020-2021

IT SHATLE - Web development(HTML, CSS)

Languages

Russian: Native.

English: Intermediate+.

Technical Skills

- Manual testing of web applications, mobile applications;
- Functional, non-functional, change-related testing;
- Create test documentation: check-list, test-cases, bug-report;
- Familiar with HTML , CSS;
- Git;
- Api testing;
- Knowledge of PostgreSQL, MySQL;
- Test design techniques.

Tools & Technologies

OS platform: Bug Tracking: Windows, MacOS, iOS, Android.
Tools: Jira, Android Studio, Swagger, Selenium IDE.
IDE: VS Code.
Test Case Management: Qase.
Web technologies: Postman, HTML, Css, Git.
